YOUR GLASS COCKPIT SOLUTION

## THE CONTROL WAS NEVER EASIER!

**TL ELEKTRONIC** Inc.

Control of your Glass Cockpit Integra was never easier and safer, using BMW cars technology. iDrive joystick control is intended to be used as extended control of our Integra Glass Cockpits, easy to reach and control, especially during turbulence etc.

iDrive joystick control faithfully replicates the right (or left) turn knob and the buttons on Integra. For example, turn movement set barometric pressure, radio frequency, transponder squawk, switching between screens etc.

**MEDIA-** play your favorite music

**RADIO** - select the radio frequency or transponder squawk

Push joystick **LEFT** or **RIGHT** to select left or right turn-knob functionality

**TURN** left or right knob for select barometric pressure or browse Menu

**BACK** - exit from Menu

**MENU** – activate list of buttons for selection

**AP** – activate/deactivate autopilot

**NAV** - select navigation source

Push joystick **UP** or **DOWN** to select active Integra in the dashboard for remote control

**OPTION** - switch next screen (EFIS, EMS, Split screen etc.)

iDrive joystick control is compatible with all Integra version 7" and 9" including ROTAX EMS Integra for Rotax 912iS engine.

**MAKES YOUR FLYING SAFER**
